About Me

I am a passionate fullstack web developer with hands-on experience in building modern, responsive web applications using HTML, CSS, JavaScript, Bootstrap, and the MERN stack. I enjoy solving complex problems and developing tools that improve user experience and functionality. With a strong eye for design and a solid understanding of web technologies, I strive to deliver high-quality and scalable solutions.

Skills

Frontend:

- HTML5, CSS3, Bootstrap 5
- JavaScript (ES6+), Responsive Design

Backend:

- Node.js, Express.js
- MongoDB

Tools & Platforms:

- Git & GitHub
- Postman, VSCode
- Netlify, Render, Heroku

Education

B.Sc. in Geography

Projects

1. **City Gallery**
   A responsive gallery site featuring modern UI to showcase cityscapes and landmarks. Built with a conversion-focused layout and optimized for performance.
   🔗 https://tubular-shortbread-f64750.netlify.app/

2. **Clothing Store**
   A clean and blog-like e-commerce concept website for clothing collections. Supports beautiful typography, clean UI, and dynamic content.
